

AND THIS AFFECTS US **DIRECTLY!**

In **Berlin-Wedding**, automobile supplier **Pierburg GmbH** switched to arms production in **July 2025**. Under strict secrecy, Pierburg GmbH now manufactures ammunition components for the Rheinmetall Group.

It is this ammunition (and its components) that kills in Gaza, in the West Bank and in wars worldwide with German involvement. **The supply chain starts in our neighbourhood and ends in the middle of war.**

WHAT CAN YOU DO? JOIN THE CAMPAIGN AGAINST WEAPONS DELIVERIES!

1. Visit our website, download our printable materials and check out our options about how you can get involved:

GENOCIDE IN GAZA, PERPETRATED WITH WEAPONS AND ARMS EQUIPMENT MADE IN GERMANY? NOT IN OUR NAME!

Starting in October 2023, Israel has been waging a war of annihilation in the Gaza Strip, which, according to official estimates, has **claimed well over 100,000 lives** - among them tens of thousands of children. UN experts, lawyers specialised in international law and genocide scholars have long been speaking of an **ongoing genocide**. Hospitals, schools and water facilities are being systematically destroyed and humanitarian aid is intentionally blocked. All the while, the German state remains a political, diplomatic and military accomplice of Israel's war effort: with **arms exports** worth almost **half a billion euros**, delivered between October 2023 and May 2025, Germany is Israel's 2nd largest arms supplier.

NO ARMAMENT, NO WAR!

Rheinmetall and other major German corporations are earning billions **while social programs are being cut**. After all, Israel's genocidal war is part of a broader armaments policy. With the €100 billion "off-budget fund" and the €900 billion planned by the CDU and SPD for the Bundeswehr (German military), Germany is to be converted to a war economy.

NATO wants to make war a permanent state of affairs. The federal government of Germany also aims to reintroduce mandatory military or "community" service. Officially, the German state apparatus says they want "cohesion" but in reality the continuing armament madness has a sinister goal: **German society is supposed to not only tolerate war but be actively involved in it** – whether with weapons, on the assembly line, or in discourse. In this process, armament and war rhetoric are systematically played off against social rights: While hospitals are closing and social benefits are being cut, billions are being spent on tanks, drones, munitions, and genocide. **The stock market value of corporations is skyrocketing.**

This is class politics: political practice in the interest of the ruling class, using military means. War – whether in Gaza, Ukraine or elsewhere – is becoming the new normal. And this new normality is enforced with violence: through investments in the surveillance apparatus, through media propaganda, through **repression of anti-genocide and anti-war protests**. Resisting this development is not an abstract gesture of solidarity, but a matter of our common interests: the protection of life against destruction and of society's future against military annihilation.

WE DEMAND

- 1. No weapons for genocide in Palestine!**
End all arms and military deliveries from Germany to Israel! Stop buying weapons systems from Israel for Germany! Arms embargo now!
- 2. End the genocide in Palestine!**
Demand the right to return of all displaced Palestinians and the immediate rebuilding of the Gaza Strip!
The warmongers, no matter if they are in Washington, Berlin or Tel Aviv, should be brought to justice!
- 3. Switch from armaments and weapons production to civilian production!**
- 4. No social cuts for war!**
Money for social infrastructure, schools, public transport, not for Germany's and NATO's militarisation policy!
- 5. Stop the criminalisation of the Palestine solidarity and the anti-war movement in Germany!**

**RESISTANCE IS ESSENTIAL
– AND POSSIBLE
FOR A LIFE IN DIGNITY
– HERE AND EVERYWHERE!**
